Quick Notes:

- When applying to positions online, most resumes go through an applicant tracking system. In order to pass the applicant tracking system and get the resume in the hands of a human being, your resume must be tailored to **each** role you are applying for. Also, having a tailored resume shows the hiring manager or recruiter that you have the skills needed for the role you are applying for.
- 1:1 tailoring sessions are meant to educate the client on the tailoring process from start to finish. Utilizing this option will equip the client in tailoring their resume and cover letter in the future. No revisions will be available for resumes and cover letters completed during sessions, as all things will be taken care of live. If a client desires to skip sessions and have the service provider take of it for them this is ok as well. In this case, **1** revision will be allowed for tailored resumes and cover letters under this package.

Quick Terms (Other Terms will be outlined in the service agreement):
